## ROBOTICS IN PHARMACY

Organized by IIC & IEDC Al Shifa College of Pharmacy

Date: 14-06-2024

Time: 09:00 am

Venue: Seminar Hall- Al Shifa College of Pharmacy

The workshop on "Robotics in Pharmacy - An Introductory Hands-On Workshop" was successfully conducted on the 14<sup>th</sup> of June, 2024, at the Seminar Hall of Al Shifa College of Pharmacy. The event was organized by the Institution's Innovation Council (IIC) and the Innovation and Entrepreneurship Development Center (IEDC) of the college. The workshop saw participation from 30 students across various courses, eager to delve into the world of robotics and its applications in pharmacy.

The program commenced with a warm welcome speech by Dr. Sanal Dev, who highlighted the significance of robotics in the modern pharmaceutical landscape. Prof. (Dr.) Dilip C inaugurated the event, emphasizing the transformative potential of robotics in healthcare and the importance of staying abreast of technological advancements in pharmacy. Dr. Arun Rasheed facilitated the event, ensuring smooth transitions between sessions.

The morning session, led by Mohammed Marwan from MEA College of Engineering, was dedicated to an "Introduction to Robotics and Basics of Coding." Mohammed provided a comprehensive overview of robotics, explaining fundamental concepts and the basics of coding necessary for programming robots. This session was highly interactive, with participants engaging in discussions and asking questions to deepen their understanding.

The afternoon session focused on "Practical Applications of Robotics and Task Solving by Students." Participants received hands-on experience with robotic kits, applying the concepts learned in the morning to solve practical tasks. This session was particularly engaging, as students worked in groups to design and program robots for specific applications, fostering teamwork and enhancing their problem-solving skills.

The hands-on experience coupled with expert guidance from Mohammed Marwan made the event both educational and inspiring.

At around 4:00 PM, a token of appreciation was awarded to the resource person by Mrs. Nikhila for his insightful contributions and effective mentorship throughout the workshop. The event concluded with a vote of thanks by Mr. Sujith Unnikrishnan. He expressed gratitude to all those who contributed to the success of the workshop, including Mr. Navas Babu, Mr. Arif, Mrs. Pallavi P, Mr. Shafin P, Mrs. Sethu R, and Ms. Deepika Dinesh A, along with the student volunteers who ensured the event ran smoothly.

## Report on the Demonstration of Vigiflow Software for ADR Monitoring

**Date:** 19th December 2024

**Event:** Demonstration of VigiFlow Software for ADR Monitoring

**Presenter:** Dr. Sai Keerthana, Clinical Preceptor, Department of Pharmacy Practice, Al Shifa College of Pharmacy

**Audience:** 5th Year Pharm D Students

**Location:** ADR Monitoring Centre, KIMS Al Shifa Hospital

### Introduction

On 19th December 2024, Dr. Sai Keerthana, Clinical Preceptor from the Department of Pharmacy Practice at Al Shifa College of Pharmacy, conducted a comprehensive demonstration on the use of **VigiFlow software** in the **ADR (Adverse Drug Reactions) Monitoring Centre** at **KIMS Al Shifa Hospital**. The session was organized for the 5th-year Pharm D students as part of their training in pharmacovigilance. The aim was to familiarize students with Vigiflow, a widely used tool for managing and reporting adverse drug reactions (ADRs).

### Overview of VigiFlow Software

Dr. Sai Keerthana provided an overview of **Vigiflow**, explaining that it is a web-based software application designed to streamline the process of ADR reporting and monitoring. Developed by the World Health Organization (WHO) for global use, Vigiflow helps healthcare professionals track and report ADRs in a structured, efficient manner.

The key features of Vigiflow include:

- **User-friendly interface** for easy data entry.
- **Structured forms** for accurate ADR reporting.
- **Real-time tracking** and analysis of ADR data.
- **Integration with national and international ADR databases** for comparison and trend analysis.

### 4. Demonstration of VigiFlow Software

Dr. Sai Keerthana then demonstrated how to navigate and use the VigiFlow software, covering the following points:

- **ADR Reporting Process:** Dr. Sai Keerthana walked the students through the process of entering an ADR case report in the VigiFlow system. She demonstrated how

healthcare professionals can input detailed information about the patient, the suspected drug, and the nature of the ADR.

- **Case Identification and Data Entry:** Dr. Keerthana explained the process of identifying ADR cases, including reviewing patient records and clinical data. The students learned how to input essential information such as the patient's demographics, clinical history, suspected drug(s), and any other contributing factors.
- **Data Validation and Review:** The software's validation checks were demonstrated, ensuring that all mandatory fields are correctly filled in before submission. Dr. Keerthana highlighted the importance of accurate and complete data entry for reliable reporting and analysis.
- **Trend Analysis and Reporting:** The demonstration also included a review of how the software generates real-time analysis of ADR trends. Dr. Sai Keerthana explained how ADR reports are categorized and how healthcare professionals can use this information to identify potential safety concerns or patterns related to drug use.
- **Follow-Up and Feedback:** The students were shown how the software allows for follow-up on reported ADRs, ensuring that additional information or updates can be added if needed. Dr. Keerthana also explained the feedback system within VigiFlow, which allows users to receive notifications or additional information about a particular ADR case.

## Conclusion

The demonstration of the **VigiFlow software** at the **ADR Monitoring Centre** in KIMS Al Shifa Hospital was an informative and engaging session for the 5th-year Pharm D students. Dr. Sai Keerthana effectively showcased the software's functionalities and its role in enhancing pharmacovigilance practices. The students now have a better understanding of how ADRs are reported and tracked, and the importance of using technology to improve patient safety.

This session provided valuable insights into the practical aspects of pharmacovigilance and ADR management, which are crucial skills for the students as they prepare to enter clinical practice. The hands-on experience with the VigiFlow software further reinforced the practical applications of their knowledge in real-world healthcare settings.

## Report on the Demonstration of UPTO DATE Software for Pharm D Students

**Date:** 19th December 2024

**Event:** Demonstration of UPTO DATE Software

**Presenter:** Dr. Sai Keerthana, Clinical Preceptor, Department of Pharmacy Practice, Al Shifa College of Pharmacy

**Audience:** Pharm D Interns

### Introduction

On 19th December 2024, Dr. Sai Keerthana, Clinical Preceptor in the Department of Pharmacy Practice at Al Shifa College of Pharmacy, conducted a comprehensive demonstration of the **UPTO DATE** software for 30 Pharm D internship students. UPTO DATE is a clinical decision support tool that provides evidence-based medical information to healthcare professionals. The session aimed to familiarize students with this resource, demonstrating its practical application in clinical practice.

### Objectives of the Demonstration

The primary objectives of the demonstration were to:

- **Introduce UPTO DATE** as a vital resource for clinical decision-making.
- **Enhance the students' understanding** of how to access and interpret medical literature and evidence.
- **Showcase the functionality** of the software, including its various features, such as drug information, disease management, clinical guidelines, and treatment recommendations.
- **Highlight the role of UPTO DATE** in pharmacy practice and its use in real-time clinical settings.

### Overview of UPTO DATE

Dr. Sai Keerthana provided an overview of **UPTO DATE**, emphasizing its global importance as a go-to resource for clinicians, pharmacists, and healthcare providers. She explained how the software compiles and updates the latest clinical data, peer-reviewed articles, and treatment guidelines from credible sources. Key features of the software include:

- **Clinical Summaries** for diseases and conditions.
- **Drug Information** and interaction checkers.
- **Treatment Algorithms** and management protocols.
- **Evidence-based Articles** and journal references.

## Demonstration of Software Features

Dr. Sai Keerthana led the students through the practical steps of navigating the software. The demonstration included the following key points:

- **Searching for Clinical Topics:** Dr. Sai Keerthana showed the students how to search for diseases, conditions, and treatment protocols using the search bar. She demonstrated how the search results are organized by relevance and how users can find concise, evidence-based summaries.
- **Drug Information:** The presenter demonstrated how to find detailed drug information, including dosages, side effects, contraindications, and drug interactions. The students were shown how to access this data quickly when dealing with clinical queries.
- **Evidence-Based Guidelines and Recommendations:** Dr. Keerthana explained the importance of clinical guidelines and demonstrated how to find the latest, evidence-based recommendations for disease management. This feature is crucial for students and professionals to stay current with evolving treatment protocols.
- **Case Studies and Clinical Scenarios:** A brief session on case studies highlighted how UPTO DATE can be used to guide clinical decision-making by referencing real-world scenarios and clinical pathways.

## Hands-On Practice

Following the demonstration, the students were given an opportunity to explore the software independently. They practiced searching for topics related to common diseases, drugs, and clinical conditions. Dr. Sai Keerthana circulated among the students, offering guidance and answering questions. This session allowed the students to familiarize themselves with the layout and navigation of the software.

## Conclusion

The demonstration of UPTO DATE was a valuable learning experience for the 30 Pharm D interns. Dr. Sai Keerthana's expert guidance helped the students appreciate the software's importance in clinical pharmacy practice. As future healthcare professionals, it is crucial for the students to utilize such tools to support their clinical decision-making and provide optimal patient care.

The session not only equipped students with the knowledge to use UPTO DATE effectively but also encouraged them to adopt a habit of continually learning and updating their clinical knowledge. The event was well-received, and students expressed a high level of satisfaction with the session.
